This is an Information Report, not finally evaluated intelligence

REPORT CLASS [REDACTED] REPORT NO. [REDACTED]
COUNTRY USSR DATE DISTR. 5 April 1982
SUBJECT Mordovian Prison Camp No. 3 at REFERENCES [REDACTED]
Barashevo (DOI: 1971 to 1972)
SOURCE [REDACTED]

1. During the period 1971 to 1972 the Mordovian Prison Camp No. 3 at Barashevo was divided into five zones under the command of Major (FNU) ((Aleksandrov)). The five zones included two working zones for women and men, two hospital zones for women and men as well as a men's criminal zone.

2. The men's working zone was for political prisoners only and was the last zone on the rail line through Barashevo. Approximately 300 men were interned in the working zone in four to five detachments (otryady) of about 50 to 60 prisoners each. The zone's chief was Captain (FNU) ((Pimenov)) who was assisted by about 15 administrative personnel. The zone was divided into two sections: one for living quarters and the second for work. (See Enclosure for a diagram of the layout of the men's working zone.)

3. The men's working zone of Camp No. 3 produced metal steering wheels for automobiles and trucks including the Zhiguli. The zone included a metal shop which provided metals for the steering wheel factory and also serviced equipment for the entire camp. The men's working zone also had a smaller workshop/factory which was a sewing plant which made gloves and string bags for sale on the local market. As of 1972 a large new shop was being constructed in the working zone. While it was not known what items were to be produced in the new shop, it is possible that the steering wheel factory was being enlarged to handle greater capacity.
